

FOUNDATION™ Fieldbus End Users Council Australia

Call for Papers

FF-EUC Aus Inc. Conference
Melbourne, Victoria – 14th September
Perth, Western Australia – 16th September

JUMP ABOARD 2005

“GET SMART – Implementing *Fieldbus*”

The Foundation™ Fieldbus End Users Council Australia (Inc) conference will be a major event which brings together international and local experts to present their experience around the theme of **“Implementing Fieldbus”**.

“Will Max and 99 get their new FF plant online and on time?” Be a part of Jump Aboard 2005 and help attendees resolve this dilemma. This year we want to focus on “case studies” of people that are in the process of building or who have just completed fieldbus process plants. Managing the change from legacy technology both from a technical and cultural point of view can be an interesting project. Many have done these projects on their own but sharing experiences is what the FF End User Council is all about. Send the committee your abstract so others can benefit from the lessons learned. Areas of interest are :- front-end design, installation & commissioning speed, maintenance expenditure, operating efficiency, plant reliability and product quality.

Papers on the following subjects will be considered:-

- Design and Installation - case studies
- Smart Maintenance concepts and strategies using fieldbus
- Operational experiences of fieldbus systems
- Central maintenance - integrating Foundation fieldbus worldwide
- Multiple fieldbus integration on a single site
- Fieldbus and Advanced Process Control - flexible function blocks
- Plant Asset Management implementation advantages
- Plant upgrades – legacy 4-20mA to fieldbus
- Integration of HSE fieldbus to Enterprise-wide systems
- Documentation experience for fieldbus systems
- Putting together a business case for the use of a fieldbus
- Fieldbus training and “gaining the competencies”

Controversial and commercial content about any fieldbus will be strictly controlled with all papers being reviewed.

An abstract of about 200 words must be submitted by 20th May 2005 for evaluation by the technical panel prior to being accepted. Accepted papers and PowerPoint presentations must be received for review by 15th July 2005. Papers not meeting the technical requirements may be edited or rejected.

Exhibition

A tabletop exposition will be held as part of each of the conference venues to provide an opportunity for manufacturers to display their range of fieldbus products or services to conference delegates.
